of what is this towns now infamy.

San Bernardino is my hometown. When past times in small talk of where i am from, the mention of "San Bernardino" would engage a conversation response from most people as:

"Where is that?".

I of course, found it amazing that as County of San Bernardino is the largest in our nation, larger than the state of Rhode Island. This place I called home being so large physically, is so small mentally in the minds of most.

I would have to get into the mention of course that I was the centennial class [1883-1983] of San Bernardino High School being in continuous open educational status, a status that most municipal educational districts across the nation can't claim for a single school.

Then of course, I would have to geographically note the start of the first McDonalds down the street a few blocks away.

Now the person on the other side of this conversation seems perplexed they never heard of San Bernardino before.

Now we can get into my first job that manifested from there -- the efforts I placed into the library system.

But you are so full of your all high mighty prejudice that you have derailed this conversation at the start.

I am being drawn to tears as I write.

I am not proud of the outcomes that a nation divided has backlashes upon of this man that is on a mission of peace.

I am not proud to be a native born resident of San Bernardino that has a mass shooting in its history and that the community will not step up to be a united force of unity in community and stop this onslaught of hate that is being received in my life that puts me here in forced persecution factors as a refugee from hate.

I am not proud to be an American under these conditions that everyone around sees the truth by their way of acting unprofessional toward me.

What did I do you all?

Absolutely nothing.

But what I did for the library back then when I was 18,

to imagine something that never existed before and manifest that something with the tools of creation of what was then a microcomputer at my reach only because a Ben Franklin's idea --- The Library System.

To imagine that there is a Library and Information Science understanding at masterful resource in the this native born citizen of the United States of America and native born San Bernardino that if no one is paying attention, is going to be lost to your reach to fix something that is a grand illusion of why this is happening.

An ongoing continuous repeating cycle event after event after event of mass shootings, an epidemic that so far no one has grasped the memetic understanding and applied some recombinant memetics forces of information theory upon the society and fix the underlying erosion of trust in this country.

Derail us off these worn out pathways that has ruts so severe that we continue on these trails no matter how ruff the road is getting to our full and complete collapse of this nation.

If you want to stand out as being an asshole, you surely did that by the attitude you held against me when you came to visit this home.

I explained the mechanics of the mental illness prejudice meme and where it derails common decency in communications to David Allen Driskill, who is part of his childhood, he lived in this home as well.

He grew up here.

His half sister too, Mysti Dawn Driskill, who part of her childhood, she lived in this home.

She grew up here.

Actually, something to mention, is the BBS that I programmed for the San Bernardino Public Library system was one of two BBSes that I originally coded from scratch as there was no such thing as commercial software for such an application of technology of an "BBS : Electronic dial up Bulletin Board System"

See Mention "James Driskill" in

Library Journal Nov 1st 1986

"Apples R Us BBS" running from inside the closet of my bedroom on a Apple][e and 3, 5 1/4" floppy drives.

The main boot up floppy after loading at power up was replaced by a data floppy meaning the code was completely placed into memory. There was no hard drive on the computer and of course if something happened, like a power failure, it would have to be restarted – no turnkey operations at the time.

i had to instruct every family member in this house how to recover the bulletin board upon a power failure.

This was a proud achievement of personally me and the Driskill Family to the telecommunication service of the local and greater community of what was just coming into being in the mid 1980s.

Mysti was my reliable agent of telecommunications to trust.

Why am I mentioning these people of this household from a 2015 forward perspective?

Take us back to San Bernardino December 2015

You being awarded here,

We could be, in this family, given a funeral for one of the family members that grew up under the roof of this home.

For Mysti, she did not attend the Christmas party that day. Perhaps destiny. For her choice was perhaps to be now included in this story.... for she might have been one of the victims. She remains alive.

But you might as well kill me -- for I have been screaming into the deaf ears of community for years. They are not listening.

You seem to have your own story of life or death outcomes that you went missing in the wilderness and were found.

Might that be also for the destiny to read this letter.

But you might as well call me dead.

You took this and have already thrown it away.

But it will be filed here for the public, someone of destiny to find and save it out of the disgrace of prejudiced --- for it is not #AllLivesMatter,

<http://persons.fuckeduphuman.net/lanier.Joseph.Rogers.III/>

That is not the equation that is the priority of this nation. This is a provable fact.

"I am like no other person that you have ever met
and I know that is for sure."

I am not what you think,
even if you know I am part of the social outcast of a
label that I take to be proud of in my 911 SOS address

The full and complete collapse of

THE DIVIDED STATES OF AMERICA

is pending with the prevailing attitudes I am embedded and attached to an intentional design of social engineering that has failed.

I have no HIV Care Doctor and no functional interface to social services as a person living with HIV/AIDS that hate is being held against me and others in the HIV Communities as a policy administration with a hate bias internal of the HHS / CDC / Ryan White Care Act Funded Services and Doctor Provider Care. All involvements of access to care terminated.

Time to give up the hate and the old paradigms of thought that your observed bias of hate-based judgments consider that "The Dirty" do not deserve [access to care](#) [link [County of Santa Clara v. HHS](#)] and deserve to die.

This is not right.

As said many times, in many parts of this nation, to those touched and who sought to touch him:

"Some men see things as they are and say why.

I dream things that never were and say why not."

- Source: [Robert F. Kennedy 1968](#)

Requires Reaching To New Understandings of what is "The Dirty" that is made in this [911 SOS Urgent Address To Former President Barack Obama](#) as having an interceding "Moral Responsibility" due to the fact that he placed pen to paper and signed the reauthorization of the Ryan White Care Act that has been severely abused to have massive and grave consequences with actual casualties in our HIV communities across this nation of uncountable and invisible and highly unnecessary and preventable HIV Deaths.

A secret agenda observed for a long term period conspiracy that the Trump policy change doubles down on that belief of faith. This enforces a very harmful policy rule that persons living with HIV deserve to die by preventable HIV Death by intentionally obstructing life wellness outcomes, ensuing chaos harassment and intentional forced direction persecutions into insurmountable walls of oppression [obviously defined] by a cause of intent by persons in the system to sentence members they dislike within the HIV communities nationally region to region to perpetual states of homelessness living with HIV/AIDS disease in the United States of America.

As a systemic problem SHOUTS a message from the system as an interfering hate paradigm against community members and the entire HIV community as:

"Go *uck Off And Die!"

 Over the past several months, I have attempted to have my correspondence with the acting CDC HIV Director Doctor Jonathan Mermin acknowledged and responded on.

I am desiring an official authority of an agency to respond a response of responsibility.

At first, the [introduction was on Twitter](#) and he immediately acted to violate my citizen's rights by [blocking my account on twitter](#). The concerns that I am needing to discuss is how the I personally have lived through two regional attacks of hate, harassment, and retaliation campaigns targeted against me to remove me and my HIV Housing residency from these communities. In the most recent case from the regional service area of Denver Colorado, it would become apparent after my defeat of my eviction case that right before I left the Denver area for my hometown of San Bernardino I named Jamie Villalobos regional director of the Colorado Health Network the puppeteer of this hate campaign targeted against me.

That reflection of mine was made in a facebook live video recorded a couple of days before I left town. It would not become self-evident who is responsible and should be held accountable until the first

reports two weeks after I left town. This by negative outlook employee Glassdoor reviews for Colorado Health Network. This was in July of 2017.

Reports reflect, "Dishonest Business Practices, To Stay Away. They Violate The Privacy of Clients, one report noted that "If you don't gossip like a teenager, you will be an outsider" and another report says they had a big investigation of racism and discrimination. Two employees quit. The investigation was reported as inconclusive.

The author of that last mention has this to say in conclusion:

Q: "How can an organization thrive when a top official is racist? If you are a woman or person of color, it is very hard to move up in the org and be heard. If you are a cute, white male, you will do well in this company"

A: The reason is that there is a hate conspiracy here affecting motives of unprofessional actions, interferences, and retaliation against dissenters, and protection for wrongdoing that soars all of the way up the chain to the CDC HIV Director as my attempts to uproot this at every single level - attempted --- to get a response to conduct an accepted complaint to be processed and acted on. So far that has not yet occurred.

At the time of the Colorado Health Network investigation report, that may have been found inconclusive. But looking at it from a fully vetted and documented perspective from this time 2019 looking at the entire umbrella of hate protecting this system by inputting and taking into account the collective reporting of similarly structured and worded Glassdoor negative outlook employee reviews of this dysfunctional foundational set forth within --- a corrosive of trust --- in the Ryan White Care Act funded social service agencies region to region, that this hate conspiracy is top rooted founded in the CDC administration of the HIV Treatment and Prevention program as a **federal program of government-sponsored hate.**

As the entire system is protecting the haters and that the haters have been allowed to win, there is no accountability for when the directors and leaders of the agencies themselves injure the community to which they are supposed to be serving. In the case of Colorado Health Network, no one has been taken aside and reprimanded. The person must be held accountable for these concerns is CDC HIV Director Doctor Jonathan Harry Mermin.

"....and another one bites the dust."

Current Employee - Anonymous Employee in Norfolk, VA

Doesn't Recommend

Negative Outlook

Disapproves of CEO

I have been working at ACCESS AIDS Care full-time

Pros

None come to mind at the moment and I am really trying to come up with one or two.

Cons

-Executive Director angry and VERY retaliatory. -Mismanagement of grant funds. AGAIN. -Executive Director still there even after extortion case. -Very unorganized . -Favoritism if your in the click. If not oh well. -Treats employees and clients like they are nothing. -Low pay for an extreme amount of committment. -ZERO ROOM FOR ADVANCEMENT. -If I could leave zero stars i would.. -I'm sure you get the picture.

Advice to Management

Restructure the entire organization starting at the top and working down. Why the Board does not see where the problem lies is beyond me which makes me look at the Board as well.

Disappointment and Mendacity [Cascade Aids Project]

Cons

Management is hostile to the union represented staff. The organization only works with a narrow part of the community yet markets something different to look more comprehensive than it is. Much of upper management is threatened by change, is conflict avoidant to the point of dysfunction and is retaliatory when confronted. Often, people with poor skills are promoted to leadership and this creates frustration and a sense of unfairness highlighting backroom agreements meant to undermine. Morale is dreadful. In the past few years most staff have been fired, pressured to leave, or asked to work with compromised ethics. Gay, black, HIV+, and trans identified staff have been systematically marginalized. CAP treated HIV+ staff as second class citizens, ignored client request for change, and silences critics. If you go against CAP, even if justified, you will find it hard to work in the HIV community in Portland. The board is completely distant from the staff and the clients being served, and act condescending and unhelpful. You would think if 50% of the staff leave in a few months time, it might be a wake up call that there are big problems that can't be dismissed as "disgruntled" staff. Since CAP is the only game in town for HIV related needs, they have no checks and balances and no accountability when they injure the community they are claiming they serve.

This agency is FRAUDULANT in its services and practices when it comes to serving the HIV population and utilizing Ryan White Funding. My recommendation for any HIV client interested in signing with them is to run as far and as fast as you can...they treat HIV consumers with contempt and unprofessionalism.

Please involve yourself in the VERY DETAILED ACCOUNT of these circumstances. The proof of conspiracy is found by the non-professional actions against me individually and the reported conditions of agency involvements in dysfunctional employee work environments that not only is negatively impacting client standards of service quality and care but are actually a force of injury upon

the HIV Communities nationally region to region that must be acknowledged and addressed. So far, no one in official authority has given a response to these documentations of multiple sources reporting this situation as haters run-a-muck and haters being allowed to win. This is an unacceptable condition of health in our country.

issue <http://stopgangstalking.org>.

What happened to me is a hate collective that targeted me both in Oakland in 2005/2006 and in Denver in 2015/2016. These events are ten years apart. I have researched the category of hashtags on the subject of #gangstalking and reports of this being a problem do date back 10 years. In my last encounter with this hate collective observance, as best as I could to real-time events, I documented what occurred in my individual case. Much of this documentation appears under the main site directory and subdirectory trees of <http://fuckeduphuman.net>. I also have several individual sources that I have identified named directly as subdomains of this internet domain space. Such examples include but not limited to:

What we have here are some provable identification sources that apparently do not mind that they have their mention on this web domain and do not or will not proceed to have a discussion even though I have for the doctors opened up with the assistance of the discussion toolkit Disqus! that is embedded in these doctor NPI Data Records.

Something is very odd here and in what has happened to me is very much defined in the experiences noted at <http://stopgangstalking.org>.

This is a hate conspiracy that is government-sponsored hate [or state-sponsored hate] that [at least the involvements that I have experienced] involve the Health and Human Resources Department and the Center for Disease Control of the Federal Government in the Administration of the Ryan White Care Act funded social service agencies. This hate embedded is a systemic problem showing region to region by negative outlook glassdoor reviews of these non-profit organization agencies.
