	Search URL [https://search.nih.gov/search?utf8=%E2%9C%93&affiliate=nih&query=Gangstalking&commit=Search] There are now 3 research documents
	You asked me about gang stalking the research findings and my story go hand hand
	The worst thing that has happened to me One day I was coming home from downtown on the BUS - the last bus for the evening. 10[,
	151 P.M. 10 pm
	I knew I could walk home so I went to the 7-11 in the process of resting before I began walking I was sitting behind the store in the alley minding my own business break holding for 15-20 or so or whatever. No I could not have that. These two guys on the parking lot side of the wall, had to focus on me somehow I knew they were aware of me and I knew something was up
	This ended up over the never 30-40 minuites in an altercatea fight an arguement and all and this women appears from the end of the alley to basically buddy pal him I was the target and she hit me in chest because I would not say what the problem was - I ended up getting out of the alley and onto the main street tried to cross the stress and they 3 surround me - they threw a bottle at me filled with some kind of liquid it broke and doubled back to get to the 7-11 safe space.
	But as I was looking backward not fully aware of my frontward I tripped. My shoe come off, and I was right in front of an SUV heading out of the driveway now the predictibment I was quickly in and the vision in my mind - I knew I was below the vision of the driver the driver is starting pulling out of the driveway I quickly got up the SUV clipped me - if I had not moved it would be been STRAIGHT OVER ME [bump bump]
	All because why? and when I finally did get into the 7-11 to report the incident and an OFFICER and an MEDICAL ARRIVED - I was telling the officer about what had happened his focus was on the HIT and RUN - and he did not persue the investigation of what was the catalyst for it ACROSS THE STREET a BROKEN BOTTLE no that was not import for hium to put in the REPORT 3 PERSONS with VIOLENT INTENTIONS the driver was

	WILD WEIRD my ankle was broken I had a cast for 6 weeks and such and when we get to everything that unfolds - I DOCUMENT EVERYTHING THAT HAS HAPPENED TO ME LIKE THIS SINCE 2005:
	I have a LIVE LIFE JOURNAL WEB SPACE The matter to which IN JUNE of 2005 REGISTERED into //fockeduoluman.net without the knowing the scope of the problem was and is gangstalking. The matter MUST BE PLACED upwared into a COMMUNITY AFFAIRS DISCUSSION it is a REAL THING and I am going to have to go "MISSING" leaving family and my life because I am COMPLETELY NOT IN SAFE SPACE in my own hometown This is REAL! Why is it so hard to hold and have a conversation and make something happen to adapt a focus to something to address this problem why is it ignored by all of civil society why do I have to deal with gang stalking for the rest of my life? If I can not get a civil society to address the problem - I want to die seriously die because I am already dying from not having a proper balanced care with my HIV
	I have not had a doctor in HIV since MARCH 2019 there is nothing of any kind of change that makes me trust anything
	I am living a waking daytime nightmare - every single day the outside of this truth peers into my life and no one cares to say it is NOT OK TO FEND FOR MYSELF no options to get LAW ENFORCEMENT to help, no options to get MENTAL HEALTH SIDE to help remains a void of distrubance of community apathy my addresses are realthe files are stored I have email sent to:

	Monitoring Editor: Gunther Eysenbach Reviewed by Shahzad Ashraf
	Conclusions These data provide insight into a novel persecutory belief system. Interpersonal concerns are important for people affected, and they construe others as either sympathetic or hostile. They create positive ambient affiliation with viewers. We found that vloggers use multimodal deixis to illustrate the
	salience of the belief system. The videos highlighted the Derridean concept of différance, wherein the meaning of polysemous signifiers is deferred without definitive resolution. This may be important in communicating with people and patients with persecutory belief systems. Clinicians may consider stepping away from the traditional true/false dichotomy endorsed by psychiatric classification systems and focus on the ambiguity in semiotic
	systems generally and in persecutory belief systems specifically. Keywords: internet, discourse analysis, psychosis, delusion, semiotics, linguistics, computer-mediated communication, schizophrenia, eHealth, video,
